PERIMIND AUTOMATE

Put AI to work on what matters

From manual processes to intelligent workflows. Built around your business, with trust and control at every step.

AI is everywhere. But is it actually moving work forward?

Organizations are investing in AI tools, assistants and agents. Yet many still struggle to turn experimentation into meaningful business outcomes.

Perimind Automate combines AI agents, trusted enterprise data and governance to help organizations automate real business processes, improve efficiency and deliver measurable value.

> Move beyond answers and recommendations to intelligent workflows that get real business work done.

TRUSTED BY LEADING FINANCIAL INSTITUTIONS, GOVERNMENT ORGANIZATIONS AND GLOBAL ENTERPRISES

AT A GLANCE

AI-powered workflows
Automate repetitive tasks and coordinate multistep business processes using AI.

Agent orchestration
Bring AI agents, tools and business systems together to support workflows that require multiple actions.

Enterprise data integration
Give AI workflows access to relevant business information through governed data connectivity.

Human oversight
Keep people involved where judgment, review or authorization is required.

Governed automation
Apply appropriate policies and controls to supported AI interactions and actions.

WHERE AUTOMATE DELIVERS VALUE

Less manual work. More meaningful outcomes.

Automate helps organizations apply AI to practical business challenges, from improving customer experiences to coordinating complex internal processes.

AI agent workflows

Enable agents to perform defined tasks and interact with approved tools and systems under appropriate controls.

Cross-system processes

Coordinate activities across applications and departments without requiring employees to manage every step manually.

Employee productivity

Reduce repetitive tasks and help employees focus on work that requires judgment, expertise and human connection.

Financial services workflows

Help streamline multistep processes involving information gathering, review and coordination across systems.

Customer & member experiences

Support more responsive, personalized interactions by connecting AI to relevant business information and workflows.

Business-focused solutions

Build automation around specific operational challenges, customer experiences and business outcomes.
