PERIMIND GOVERN

Give AI more responsibility. Keep control.

Control AI actions at runtime. Enable innovation with confidence, oversight and accountability.

AI is taking action. Are your controls keeping up?

AI assistants are evolving into agents that access business data, invoke tools and initiate workflows. As their capabilities grow, so does the need for clear policies and accountability.

Perimind Govern brings enforceable policies into AI interactions and workflows, helping you manage access, guide agent behaviour and maintain oversight as AI capabilities expand.

> Give AI the freedom to do more, with controls that keep your organization in charge.

TRUSTED BY LEADING FINANCIAL INSTITUTIONS, GOVERNMENT ORGANIZATIONS AND GLOBAL ENTERPRISES

AT A GLANCE

Policy management
Define policies for AI access, model usage, data handling and permitted actions.

Runtime enforcement
Apply controls at supported enforcement points as AI interactions and actions occur.

Agent access & permissions
Manage how AI agents interact with approved tools, information and business systems.

Oversight & accountability
Assign policy ownership, support human oversight and maintain records of governance decisions.

Progressive governance
Start with monitoring and introduce additional controls as business requirements and risks evolve.

AI ACTION GOVERNANCE

Stay in control, from AI assistance to AI action

The more AI can do, the more important it becomes to govern how it operates. Govern helps organizations apply appropriate controls across common AI interactions and activities.

Agent actions

Establish controls around the actions agents can initiate through connected tools and systems.

Data access & handling

Apply policies governing how AI interacts with sensitive or business-critical information.

Human oversight

Introduce approval requirements for supported actions that need additional review or authorization.

Model & tool access

Define which models and tools can be used in supported AI workflows.

Monitor before you enforce

Begin with monitoring-oriented policies and introduce additional controls as requirements evolve.

Policy accountability

Connect governance decisions to defined policies, responsibilities and records.

PART OF PERIMIND, THE PLATFORM FOR TRUSTED AI OPERATIONS

Observe | Govern | Connect | Automate

Let AI do more. Stay in control.

Explore runtime AI governance tailored to your organization's AI environment and priorities.
