cinchy

Remove the Complexity, Minimize the Risk

Cinchy Enables ERP and CRM Consolidation Success

According to Gartner, ERP implementation failure rates can exceed 75%. Approximately 45% of system consolidation projects run over budget.

Cinchy minimizes the risk and complexity associated with standard integrations by bringing the automation, data governance and synchronization needed for system consolidation success.

Choose a Better Alternative

Reduce Risk, Mitigation Failure Rate
Minimizes business disruption and failure rate associated with manual data migration, including data loss, corruption, and security vulnerabilities.

Cost Efficiency
Less than half the cost and IT resource versus standard integrations, plus quicker time to market and reduced licensing costs.

Better Data Governance
Improves compliance, data traceability and visibility.

No Cut-Over Pause
Incremental and seamless transitions to new systems avoid business disruption.

Improved Productivity
Streamlines data access and utilization across the enterprise, saving significant time and resources.

Enhanced Decision-Making
Offers a comprehensive and collaborative view of data, fostering a more dynamic and interconnected data ecosystem.

Remove the Headache and Simplify All Things Data

While other solutions provide data integration tools, Cinchy goes beyond that scope as an enabling technology that delivers efficiencies and mitigates risk at every stage of your consolidation methodology.
